10. BRIEF SUMMARY OF SIGHTING Oblong sphere, size of dime. Bright white front, reddish rear. Appeared 80°-90°. Disappeared 40°-50°. Appeared to have a slight weaving or rolling motion. Just faded from view.			11. COMMENTS Description, flight path, and duration are characteristic of a satellite. Reporting agency checked with Goddard Space Flight Center, which confirmed that satellite Echo I was objt in question.

May 10: Syracuse, N.Y. -- Two F-101 jets from Griffis AFB were sent to chase a "mysterious light" moving across the sky. Several UFOs in a group were reported over Ohio same night about 9:30 p.m.

May 11 Lake Worth, Fla. -- NICAP member Jeffrey Niehaus and a school teacher in a separate location sighted a brilliant UFO which first hovered, then shot upwards at tremendous speed. The teacher said in a report to NICAP: "It ascended at a speed greater than anything I have ever witnessed."

May 13: Capt. R.A. Ainsworth, commander of an East African Airways Comet jet reported that he and his crew had seen a flying saucer while flying across the Sudan that morning.

Capt. Ainsworth said he saw the "saucer" just after dawn. It was flying parallel to this Comet airliner.

"It was like a very large green fire with a shower of red sparks behind it," he said. He called his navigator, first officer and engineer officer, who all saw the object and agreed it was either a flying saucer or an abandoned satellite.

12/17/72 MAY ECHOEN

May 4; Oil City, Pa.-- Mr. and Mrs. [redacted] and others sighted a missile-like object about 8:30 p.m. which appeared to be controlled. As Mr. Wein-gard described it to the News-Herald: "At first it appeared like a quarter moon; but as it moved closer, it took the shape of a missile. It changed in color from a bright fire-red to orange

and then a darker orange as it passed over the area. There also seemed to be a large ball-like section in the nose of the vehicle and about every ten seconds, a light would flash on and off in the nose cone. The higher it climbed (towards the WNW), the longer it appeared in shape." The UFO was visible 5-6 minutes.

Two hours later in Mayfield Heights, Ohio, (about 80 miles to the west) Bertha M. Kinkoff, John Carroll Univ. biology student, and her father observed a very bright yellow-white UFO moving from E to W.

May 5: Athol, Mass. -- An unidentified  
whitish light which moved back and forth  
making sharp angle turns, and dropped  
progressively lower until out of sight  
behind trees, was sighted for about 20  
minutes beginning at 10:10 p.m. by five  
witnesses at the railroad depot. One  
of the witnesses, Delano Demarest, filed  
a report with NICAP. Mr. Demarest  
~~said the UFO moved much more rapidly~~  
~~than a plane.~~

No Case (Information Only)

7 May 1961  
Gundagai, Australia

Astronomers at Mount Stromlo Observatory in Australia were seeking a solution to the mystery of a photograph taken of a strange object seen glowing with bluish light in the night sky near Gundagai on May 7, 1961. Assistant N.S.W. government astronomer Mr. [REDACTED] said, after having seen the photograph: "I don't know what it could be. I can't explain it at all." The photograph, according to APRO was taken by Naval rating [REDACTED], an electrical mechanic, a four minute exposure shot with a high quality camera. The shape of the object was generally circular with a "nose" effect pointing earthward.

World Chronicle on Mysterious Celestial Objects, the OVNI in Poland (continuation)

1. Flying Saucers in the Karpathian regions

Source: extract from the book FLYING SAUCERS by Yanoush Tore(sp?)  
Antonium editions Warsaw 1961; original text in the Polish  
language

At the end 1958, a weekly D \_\_\_\_\_ S \_\_\_\_\_ published a series of articles on the subject of flying saucers. The direct cause of the publications was news that arrived from the Karpathian region. The majority of the inhabitants of the village of Melofca (sp. ?) near Seweech (sp. ?) saw some flying saucers. To check up on these observations the editorial office sent to the spot a crew consisting of several persons. Some of them were believers in these things and others were against the idea of \_\_\_\_\_

A number of stories by eye witnesses were published. We will sight 2 of them.

1. the Testimony of Mr. R. G.

We were living at the time in M \_\_\_\_\_ near Z \_\_\_\_\_.  
afternoon of January 1957 my wife called me to the garden. I saw in the sky to the left of the mountain, directly in front of me in the direction of the village East Edna, three clear balls. They were of the same size and symmetrically arranged. The next day my wife called me to the balcony a second time. I saw the sun located in an unusual place. At first, it was very difficult to determine which of the two balls \_\_\_\_\_. One of the strange balls, however, was another color---blood red, and colored everything around it. I do not remember any longer when and how this phenomena disappeared.

2. the testimony of Mrs. K.

All of a sudden Mrs. K. perceived a flying object, round and silvery-white, bulging out on the bottom\* similar to a hat. It was flying towards the village in an oscillating motion and was shining like a mirror exposed to the sun. Mrs. K. supposed that it could be at an altitude of about 500 meters and have a diameter of about 20 meters. (\* bulged out above) The object was completely flat on the bottom and Mrs. K. could not distinguish any detail on the rounded upper part. At a certain moment the object turned around and went away in the direction of North East towards the village of Bere Zetta (sp. ?) at a very high velocity. It then disappeared between two mountains and Mrs. K., astonished, supposed that it was a new kind of aircraft, not having heard anyone speak about flying saucers.

2nd Heading: Observation of Poland, called to the Attention of Mr. \_\_\_\_\_  
by \_\_\_\_\_ President of Polish Section of the AMI in Poland

1. We had an observation of unidentified flying object May 9, 1961 at

6:00 in the evening.

1. It was a case of an object of cylindrical form like a cigar which remained suspended, without budging, over the village of Gadisk Mouseveski (?) situated at 40 kilometers to the west of Warsaw. The object was very brilliant, blinding. After a time, it began to move slowly. It changed its position to horizontal (ly) and shifted towards the west. The observation lasted about a half an hour and it took place over the center of the railroad switching yards.//This report was edited by one of my acquaintances, Madam Stenestava Roslovits who was a witness to this observation along with a number of other persons.

As far as I know the Astronomic Observatory of Warsaw has some details concerning this object, but I do not know what twaddle they invented to explain this apparition.
